

# GRADUATE RESUMES

## Engineering

Your success in gaining an interview for a graduate position or progressing further in the application process, hinges upon the quality of the written application you provide to an employer.

This is your opportunity to demonstrate that you possess the necessary knowledge, skills and abilities for the position.

### Tailor your resume

Your resume is a marketing tool. It is **essential** that you **tailor your resume for every job application** to increase the fit between you, the job and the employer.

Thoroughly research the organisation and the position to determine what the employer is looking for.

A role in the public sector may have a different focus from a private company. Your resume layout/style may vary according to the sector you are applying to.

Emphasise your strengths, achievements, skills and abilities as they relate to each particular job you are applying for.

Reflect on your past study and work experiences, extracting points which could help to sell yourself to an employer.

### Headings

There are no set headings for a resume, although the following headings are commonly included. Decide what headings best match you to the prospective employer's expectations.

Under each heading list experiences in reverse chronological order, most recent first.

#### PERSONAL DETAILS

- Name, address, phone and email.
- LinkedIn Profile – ensure your profile is up to date. Consider personalising your URL (see our LinkedIn information sheet)
- Photo, date of birth, marital/parental status and health are **not required**.

#### PROFESSIONAL SUMMARY or CAREER STATEMENT (2-3 lines)

Some engineering employers regard this section as essential. This is your opportunity to market your key selling points plus state why you want the job.

#### EDUCATION

Tertiary, high school (only list high school if you are a recent school leaver and have relevant achievements to list) and other relevant training qualifications. Begin with your **Bachelor of Engineering**.

#### MEMBERSHIPS

Include memberships of professional or industry bodies.

#### PRACTICAL INDUSTRY EXPERIENCE

Undertaking an industry placement is a great way to gain practical experience in your field. Make the most of this when preparing your resume. Consider how you can describe your responsibilities, achievements, range of duties, range of situations (small business, large corporation, government department etc.). What skills did you learn? How did you contribute?

#### EMPLOYMENT HISTORY

Begin with most recent. Use bullet points to list your responsibilities and achievements for each role - tailor these to the position. Do not leave gaps in your resume. If you travelled or cared for a family member for 6 months list this.

#### REFEREES

Supervisor/Manager/Academic. Avoid personal referees. (Usually 2 to 3 people)

### Optional Headings

Professional Development	Key Skills
Extra-Curricular Activities	Publications
Special Awards	Volunteer Work
Community Involvement	Research Projects

### Language

Use professional vocabulary, e.g. 'negotiated', rather than 'worked out'. Use verbs to describe your skills and employment achievements. See the [Action Verb Information Sheet](#) for more examples.

### Top Tips

- Thoroughly research the organisation's application procedure to determine what is required.
- Tailor your resume to the job description / organisation requirements of the position.
- Emphasise achievements to demonstrate your capacity.
- Be clear, concise and truthful.
- Check page requirements if identified by the employer.
- Use a simple, professional layout with consistent font/bullets.
- Use bullet points to list your placement and employment history and associated responsibilities and achievements.
- Check and check again for spelling and grammatical errors.
- Check if **applicant tracking system software** is being used to short list resumes and modify layout if so. Online screening software can't read photos, clipart, tables, fancy fonts, borders.

See our information sheet on Applicant Tracking Software – [Can a robot read your resume?](#) To ensure your resume will get through any online screening tools.
